DEVALLA BHASKAR GANESH

Course : **B.Tech**, Computer Science & Engineering, 2025

Email : devallabhaskarganesh@gmail.com

Mobile : 9985337337

CGPA : 8.21

ACADEMIC DETAILS

COURSE	INSTITUTE/COLLEGE	BOARD/UNIVERSITY	SCORE	YEAR
CLASS XII	Sri Bhavishya Junior College	Andhra Pradesh Board of Intermediate Education (BIEAP)	65 %	2021
CLASS X	Slate The School	Andhra Pradesh Board of Secondary Education (BSEAP)	9 CGPA	2019

Subjects / Electives	Integrated Professional English, Mathematics For Computing, Computational Thinking for Structured Design, Design Tools Workshop - I, Digital Logic and Processors, English Proficiency, Design Tools Workshop - II, Data Structures, Computational Thinking for Object Oriented Design, Mathematics For Engineers, Design Thinking and Innovation, Computer Organization & Architecture, Essential Skills for Employability (HSS4), Operating Systems, Computer Networks and Security, DataBase Management Systems, Probability ,Statictics & Queueing Theory, Mern Stack Web Development, Social Internship, Design Analysis and Algorithms, AI For DataScience, Software Engineering, Competitive Coding Training Level 1, Problem Solving Skills-I, Automata Theory and Formal Languages, Python Full Stack Development with Django, Mathematical Programming, Graphic Design, Tool Based Learning-1(Cloud Foundation), Enterprise Programming, Kho-Kho, Technical Internship, Problem Solving Skills-II, Machine Learning, Advance Operating Systems, Innovation Management, Java Full Stack Development +Micro Services, Cloud Infrastructure and Services
Technical Proficiency	C Programming, Java, Python, HTML + CSS, MySQL

SUMMER INTERNSHIP / WORK EXPERIENCE

Director for Academics and Skill Development Wing, Focus-Official Student Governance Body — **Mar 2022 - Dec 2023**

1. Spearheaded the development and implementation of a comprehensive academic support program, resulting in a 20 percent improvement in average student grades across key courses within one academic year.
2. Initiated and led a series of skill development workshops in collaboration with industry experts, covering areas such as coding, data analysis, and soft skills, benefiting over 1,000 students and enhancing their employability.
3. Recognized by the student governance body and academic staff for outstanding leadership and dedication to improving the academicand professional outcomes for students, receiving the "Excellence in Student Leadership" award.

Peer Mentor, K L University — **Jul 2022 - Nov 2023**

1. Facilitated one-on-one and group mentoring sessions for over 100 students, leading to a noticeable 15 percent improvement in their academic performance and a 25 percent increase in class participation rates.
2. Designed and implemented a peer-led workshop series on study skills, time management, and stress management, which was attended by 200+ students and subsequently integrated into the foundation's annual programming.
3. Collaborated with faculty to identify and support at-risk students, resulting in 90 percent of these students achieving academic improvement and greater engagement in campus activities.

Technical Events Coordinator, Hash include 23 (A National Level Techno Fiesta) — **Mar 2023 - May 2023**

1. Orchestrated the planning, organization, and execution of 10+ technical events, including workshops, competitions, and keynote speeches, attracting over 5,000 participants nationwide.
2. Successfully negotiated with 15+ sponsors and vendors to secure funding and resources, exceeding the event's funding goals by 20 percent and ensuring a high-quality experience for participants
3. Implemented an online registration and event management system that streamlined participant sign-ups and engagement ,resulting in a 30 percent increase in participant satisfaction scores compared to previous years.

Management Lead, Expedite Low Code Club — **Jul 2023 - Dec 2023**

1. Spearheaded the development and implementation of a strategic plan that increased club membership by 25 percent within one year, enhancing the club's community presence and engagement.
2. Led a cross-functional team of 15 members in the design and launch of 5 innovative projects leveraging low-code platforms, resulting in a 40 percent reduction in development time and a 30 percent increase in project delivery efficiency.
3. Instituted a mentorship program that boosted team members' skills in low-code technologies, contributing to a 35 percent impro vement in project quality and a 20 percent increase in team satisfaction scores.

PROJECTS

Enterprise Resource Planning (ERP) Implementation - React,Django — **Jun 2022 - Oct 2022**

1. Developed an Enterprise Resource Planning (ERP) system utilizing React.js for the front-end to ensure an intuitive user interface and Django for the back-end, facilitating robust data management and server-side logic.
2. Integrated multiple business modules within the ERP system, including inventory management, human resources, finance, and customer relationship management, to support seamless, interconnected operations and improve organizational efficiency.

3. Enhanced business operations by enabling real-time data access, streamlined process workflows, and improved cross-departmental collaboration through the custom-built ERP platform, leading to more informed decisionmaking and operational agility.

Stock Management System - Enterprise Programming **Mar 2023 - Jun 2023**

1. Created a Stock Management System for an Enterprise Programming course project, employing advanced programming techniques to facilitate efficient inventory tracking and management.
2. Focused on optimizing inventory control by implementing features for real time stock level monitoring, automated reorder alerts, and detailed reporting to prevent stockouts and overstocking.
3. Enhanced operational efficiency through the system's ability to streamline inventory processes, improve accuracy in stock records, and support strategic decision-making with comprehensive inventory analytics.

Emotion Speech Recognition - Speech Recognition **Jun 2023 - Nov 2023**

1. Engineered an emotion analysis and recognition system within specialized coursework, leveraging advanced signal processing and machine learning techniques to discern emotions from speech patterns accurately.
2. Centered the project on detecting a range of emotions in speech, such as happiness, sadness, anger, and fear, to enable nuanced understanding and interaction with technology based on the user's emotional state.
3. Developed a cutting-edge tool for emotion recognition, providing innovative solutions for applications in mental health assessment, customer service, and interactive AI, enhancing empathetic responses and engagement.

Disorder Speech Recognition - Speech Recognition **Jun 2023 - Nov 2023**

1. Developed a Disorder Speech Recognition system as part of specialized coursework, utilizing cutting-edge machine learning algorithms to achieve high accuracy in recognizing and interpreting speech from individuals with speech disorders.
2. Emphasized precision in speech recognition by tailoring the technology to understand varied speech patterns, including those affected by disorders, enhancing communication capabilities for users with speech impairments.
3. Pioneered an innovative tool aimed at assisting individuals with speech disorders, significantly improving their ability to communicate effectively and interact with technology seamlessly.

Multingual Speech Translator - Artificial Intelligence **Mar 2023 - Jul 2023**

1. Created a real-time language translation project, leveraging state-of-the art machine learning models to facilitate instant translation across multiple languages, enhancing global communication.
2. Designed with an intuitive user interface, ensuring ease of use for individuals to communicate in diverse languages effectively, breaking down language barriers in personal and professional settings.
3. Enabled seamless cross-lingual interactions, integrating advanced translation algorithms to provide accurate and context-aware translations, supporting more meaning and efficient communication worldwide.

Video Processing - Artificial Intelligence **Mar 2023 - Aug 2023**

1. Developed a comprehensive video analysis and manipulation system as part of academic coursework, utilizing efficient algorithms to support a wide array of video processing tasks.
2. Focused on enhancing video content analysis by implementing features for motion detection, object tracking, and scene recognition, enabling advanced manipulation and editing capabilities.
3. Employed diverse video processing algorithms to ensure high performance and accuracy across various applications, from video enhancement and editing to automated content generation and analysis.

AWARDS AND RECOGNITIONS

Best Lead in Focous Academics and Skill Development | Focus-Official Student Governance Body **Jun 2023**

Best Coordinator for Techinal Committee for hash include 23(A Nationl Level Techno Fiesta) | Hash include 23 (A National Level Techno Fiesta)

Jun 2023

CERTIFICATIONS

CERTIFICATION	CERTIFYING AUTHORITY
Microsoft Certified: Security, Compliance, and Identity Fundamentals	Microsoft
Juniper Networks Certified Associate, Junos (JNCIA-Junos)	Juniper Network
Microsoft Certified: Azure AI Fundamentals	Microsoft
Google Cloud Certified Associate Cloud Engineer	Google
Microsoft Certified: Azure Fundamentals	Microsoft

PUBLICATIONS

Emotion Speech Recognition in the Cloud **Journal name: IEEE | Publication date: Mar 22, 2024**

Emotion speech recognition in the cloud has emerged as a transformative technology with the potential to revolutionize various sectors, induding customer service, mental health, and human-computer interaction. This abstract provides an overview of the key concepts and approaches involved in the development and deployment of emotion speech recognition systems in doud-based environments. Emotion speech recognition leverages advances in machine learning, natural language processing, and cloud computing to detect and analyze emotional cues in spoken language. By identifying emotional states, such as happiness, sadness, anger, and more, these systems offer valuable insights for businesses and healthcare providers, enabling them to improve customer experiences and mental health services.

Flask-based ASR for Automated Disorder Speech Recognition **Journal name: Procedia Computer Science | Publication date: Jan 11, 2024**

Speech disorders encompass a diverse range of conditions hindering effective communication, stemming from developmental, neurological, or physical factors. These challenges impact daily life and opportunities. Automatic Speech Recognition (ASR) technology emerges as a pivotal solution. ASR, powered by sophisticated algorithms, transcribes spoken language into written text, transcending traditional communication barriers. Tailorable to accommodate unique speech disorders, ASR offers the promise of empowering individuals to articulate their thoughts. Our Python Flask-based ASR (FBASR) applications meticulously crafted to cater to individuals, including children, grappling with speech disorders. It provides a user-friendly platform. Users simply submit a speech audio file in WAV format, and the application transcribes it. Alongside recognized text, it furnishes vital audio metrics. Additionally, it generates visual audio signal and spectrogram representations, all stored efficiently for future reference. The application's profound advantage lies in granting a voice to individuals with speech disorders, facilitating education, employment, and healthcare interactions. Furthermore, it serves as a resource for research and therapy development, promising inclusivity and enriching lives. The proposed work concludes by discussing the future outlook of cloud-based ASR and identifying some of the key areas of research that need to be addressed to make cloud-based DSR systems more accurate, reliable, and accessible.
